

PERFORMANCE • VALUE • SERVICE

Door & Hallway Systems

Trac-Rite is your experienced partner for planning, manufacturing, and installing doors, hallways, and storage partitions.

Building shells by others featuring Trac-Rite doors, hallways, and partitions.

Trac-Rite offers a complete hallway, door and corridor system.

Why Trac-Rite?

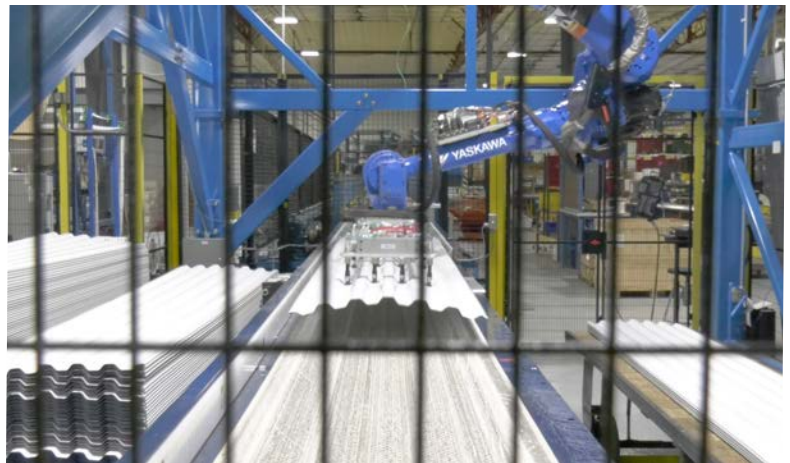

Trac-Rite is employee-owned, and have recently made major investments in our factory. Our production facility utilizes best practices throughout, including a number of automated robotic techniques that translate to consistent quality and great value for our customers.

- Doors and hall systems arrive on the same truck from one factory
- Smooth, attractive header and jamb system
- Prepunched baseplates for fast, consistent installation
- Choose from a variety of options to meet your needs

Why Trac-Rite Doors?

We manufacture a great door, we offer great service, and ship promptly at a competitive price.

- Quiet, smooth operation: Three large felt back strips prevent the door from binding or nesting
- Coated springs: The EP3 spring coating prevents spring rust and eliminates the need for messy grease - now and in the future
- Colors: Trac-Rite offers a large array of colors, all at the same price - no separate pricing tiers for any of our in-stock coils
- Fast: Trac-Rite's state of the art, efficient manufacturing facility means fast order turnaround

Available options for Door and Hall Systems

Diamond Plate Corners

Corners are 4' tall aluminum diamond plate. This photo also shows an ADA kit with a sign and grab handles.

Diamond Plate Kick Panels

Kick panels are available for runs of blank walls. Sized at 1' tall, these are ideal for preventing damage from platform carts. Taller sections are available.

Diamond Jamb Panels

The panels are 1' tall and sized to slip over the bottoms of the jambs for additional protection.

Chamfered Corners

Full height diamond plate corners with a 45 degree angled section are available.

Wire Mesh Top

Welded wire mesh is available for security across the top of units.

Burglar Bars

Bright white or galvanized bars may be installed over units to block access over walls while still allowing for airflow.

Ribbed Walls

Ribbed bright white panels are used for hallways walls and available as liner panel on other existing walls.

Flush Walls

Hallway walls may be upgraded to a 24 gauge flush panel, which is fastened from the rear.

Latches

The Spaceguard latch is standard, factory installed.

Latch Punch Only

The doors may be ordered with hole punches for latches by others. This allows you to use the automated locking systems, Chateau latches (pictured), or others with common bolt patterns.

Stainless steel latches (field installed) also available.
